

## TABLE OF CONTENTS

|                                                                                                                                                                                  |         |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| The Practicality of Augmented Reality Digestive System (ARDis) Media Based on Hyperlipidemia Research as an Accentuation of Students' Science Literacy.....                      | 98-105  |
| Development of Problem-Based E-Modules on Environmental Change and Preservation to Improve Critical Thinking Skills of High School Students.....                                 | 106-119 |
| Implementation of Problem-Based Learning Based Multiple Representations to Improve Critical Thinking, Communication, and Collaboration Skills on Digestive System Material ..... | 120-130 |
| Development of a Teaching Supplement on the Threat of Degenerative Diseases of the Circulatory System to Improve Students' Scientific Literacy.....                              | 131-141 |
| Application of E-LKPD Based on Guided Inquiry to Science Process Skills, Cognitive Learning Results, and Learning Motivation of Excretory System Material.....                   | 142-148 |
| Development of a Teaching Supplement on the Threat of Degenerative Diseases of the Circulatory System to Improve Students' Scientific Literacy.....                              | 149-159 |
| Analysis of Students' Self-Efficacy Toward Biology Learning Outcomes in Grade X at SMA Negeri 1 Jakenan Under the Implementation of the Independent Curriculum .....             | 160-168 |
| The Effect of PBL in Teaching at the Right Level Approach on Collaboration Skills and Student Learning Outcomes in Coordination System Material .....                            | 169-177 |
| The Effectiveness of Discussion Methods Assisted with Wordwall Media to Improve High School Student Learning Outcomes Human Movement System Material .....                       | 178-187 |
| Development of e-LKPD with a Scientific Approach to Improve Critical Thinking Abilities and Science Process Skills In Biotechnology .....                                        | 188-200 |
