Jurnal Dinamika Manajemen (JDM) is a journal published by Management Department, Faculty of Economics, Universitas Negeri Semarang. JDM publishes twice in a year (on March and September) consisting nine articles and accepting articles in the fields of financial, human resources, marketing, operation, strategy management and management information system with the standard of research method for publication. The articles can be written by researchers, academics, practitioners, and observers in the field of Management who are interested to conduct research in Management area.

GENERAL GUIDE
1. The article is original guaranteed by the writer and is not published by the other journals/proceedings.
2. The contribution toward the development of science and technology is from the new findings/ideas/opinions which prioritize the current primary references at the latest 10 years.
3. The article is an empirical study. The sharpness of critically analysis and synthesis is much prioritized.
4. The review process is conducted in blind review process with the peer group system, which is reinforced by the qualified reviewers in their field.
5. The article is written according to the rule of JDM and an editorial team reserves the right to revise the style of writing with a note that it does not change the intent and quality of the article.
6. Questionnaires and other instruments. Manuscript articles that use primary data research or experimentation must also include the questionnaires.
7. Authors are obliged to send the results of data processing as well as tables and the original image file via email.
8. Articles submitted online through journal.unnes.ac.id or email address to jdm.unnes@gmail.com and equipped with a curriculum vitae, correspondence address, origin of the institution agencies, email and phone number/mobile phone.
9. Results of the assessment possibilities articles can be:
   a. Accepted with minor revisions.
   b. Accepted with major revisions.
   c. Suggested sent to another appropriate journal.
   d. Rejected.
SPECIAL GUIDE
A. The Writing Guidance

1. The article is well-written in English. The writing of foreign language is italicized. Typed single space for the abstract, single space for content and single space for references. Written by font Times New Roman (TNR) 12pt size and indent for paragraphs is 1 cm.
2. The paper size is A4 (210 x 297 mm), it is two columns and the page setup is: top margin 2.5 cm; bottom margin 2.5 cm; left margin 2.25 cm and right margin 2.25 cm.
3. The font size for the title is TNR 14pt; it is capitalized, bolded and left justified.
4. After the title, it is followed by the author (without the title). It is TNR 12pt, capitalized each word, bolded and left justified.
5. Under the author, it is the institution and the email at TNR 12pt, capitalized each word, without bolded and left justified. For example: Faculty of Economics, Universitas Negeri Semarang, Semarang, Indonesia.
6. Correspondence address of author is listed on the left under the articles in English, accompanied by a corresponding email address.
   For example: Kaliurang KM. 14,5 Sleman, Yogyakarta
   E-mail: ratihkk@yahoo.co.id
7. The font size for the sub-part in the article is TNR 12pt, capitalized each word, bolded and left justified and without any bullet and numbering.
8. Table.
   All table form as an example. Table title is placed on the table with left justified; For example: Table 1. Production Data and Market Share.

<table>
<thead>
<tr>
<th>Production Activity</th>
<th>Estimate</th>
<th>Actual</th>
<th>Difference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Main Ingredient</td>
<td>445.000 Ton</td>
<td>340.000 Ton</td>
<td>23.60%</td>
</tr>
<tr>
<td>Product</td>
<td>422.750 Ton</td>
<td>323.000 Ton</td>
<td>23.60%</td>
</tr>
<tr>
<td>Market Share (%)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>X</td>
<td>30</td>
<td>35</td>
<td>35</td>
</tr>
<tr>
<td>Y</td>
<td>35</td>
<td>30</td>
<td>25</td>
</tr>
<tr>
<td>Z</td>
<td>20</td>
<td>20</td>

</tr>
<tr>
<td>Other</td>
<td>15</td>
<td>15</td>
<td>10</td>
</tr>
</tbody>
</table>

9. Figure
   Writing the title of figures and graphics placed under the pictures with left justified.

![Diagram](image_url)

**Figure 1. Framework of Thinking**
10. The total page does not exceed 25 pages, including the references and appendices (if any).

B. The Article Systematic
The article systematic includes: the title; the identity of the author (without a title); abstract; keywords; introduction, method; result and discussion; conclusion and recommendation and references. While discussion about literature review and previous studies included in the introduction or result and discussion.

C. The Article Format
1. Title. The title must be interesting, specific and informative, which is measured by directness in writing.
2. The author identity. It includes the author’s name (without the title), the institution, correspondence address, and the email.
3. Abstract. It is written in 170-200 words, in two languages; Bahasa Indonesia and English. Abstract in English is written first and then abstract in Bahasa Indonesia. The abstract should include the purpose of research, data / object of research, method, result or conclusion.
4. Keywords. The keywords should be written in English. Keywords should be chosen carefully and is able to reflect the concepts / variables contained in the article, with the number of three to six keywords.
5. Introduction. It is the state of arts of the research, which consists of the background of the study, the motivation of the study, the theories and the objectives of the study. It is written in the form of paragraph.
6. Method. It consists of the research design (the method, the data, the data source, the data collecting technique, the data analysis technique, the variables measurement) that written in the form of paragraph.
7. Result and discussion. Contains the results of empirical or theoretical study written by a systematic, critical analysis, and informative. The use of tables, images etc. only to support or clarify the discussion and is confined only to support a substantial information, eg, tables of statistical tests, the results of model testing etc. Discussion of results should be argumentative regarding the relevance of the results, theory, previous research and empirical facts, as well as demonstrate the novelty of the findings.
8. Conclusion and recommendation. It consists of the conclusion, clarity of new findings, new theories and the possibility of the future research development.
9. References. The degree of sophistication of materials referred to in the span of 10 years. The references are expected to be 80% of the primary sources originated from the national and international journals. Write references that really referenced in the article and arrange it in alphabetical. Writing citations that referenced in the script should use reference application (reference manager) such as Mendeley, Endnote, Zotero, Reffwork and others.

Example of references:

*For academic journals:*

**For books:**

**For papers in seminars:**

**For unpublished thesis or dissertation:**

**For internet sources:**

**Government official documents:**

Undang-Undang Republik Indonesia Nomor 40 tahun 2007 tentang Perseroan Terbatas pasal 74 ayat 1.

ETHICS & MALPRACTICE STATEMENT

Our ethic statements are based on COPE’s Best Practice Guidelines for Journal Editors.

Publication decisions
The editor is responsible for deciding which of the articles submitted to the journal should be published. The editor may be guided by the policies of the journal’s editorial board and constrained by such legal requirements as shall then be in force regarding libel, copyright infringement and plagiarism. The editor may confer with other editors or reviewers in making this decision.

Fair play
An editor at any time evaluate manuscripts for their intellectual content without regard to race, gender, sexual orientation, religious belief, ethnic origin, citizenship, or political philosophy of the authors.

Confidentiality
The editor and any editorial staff must not disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.

Disclosure and conflicts of interest
Unpublished materials disclosed in a submitted manuscript must not be used in an editor’s own research without the express written consent of the author.

DUTIES OF REVIEWERS

Contribution to Editorial Decisions
Peer review assists the editor in making editorial decisions and through the editorial communications with the author may also assist the author in improving the paper.

Promptness
Any selected referee who feels unqualified to review the research reported in a manuscript or knows that its prompt review will be impossible should notify the editor and excuse himself from the review process.

Confidentiality
Any manuscripts received for review must be treated as confidential documents. They must not be shown to or discussed with others except as authorized by the editor.

Standards of Objectivity
Reviews should be conducted objectively. Personal criticism of the author is inappropriate. Referees should express their views clearly with supporting arguments.

Acknowledgement of Sources
Reviewers should identify relevant published work that has not been cited by the authors. Any statement that an observation, derivation, or argument had been previously reported should be accompanied by the relevant citation. A reviewer should also call to the editor’s attention any substantial similarity or overlap between the manuscript under consideration and any other published paper of which they have personal knowledge.

Disclosure and Conflict of Interest
Privileged information or ideas obtained through peer review must be kept confidential and not used for personal advantage. Reviewers should not consider manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships or connections with any of the authors, companies, or institutions connected to the papers.
DUTIES OF AUTHORS

Reporting standards
Authors of reports of original research should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable.

Originality and Plagiarism
The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others that this has been appropriately cited or quoted.

Multiple, Redundant or Concurrent Publication
An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behaviour and is unacceptable.

Acknowledgement of Sources
Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work.

Authorship of the Paper
Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors. Where there are others who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors.

The corresponding author should ensure that all appropriate co-authors and no inappropriate co-authors are included on the paper, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication.

Disclosure and Conflicts of Interest
All authors should disclose in their manuscript any financial or other substantive conflict of interest that might be construed to influence the results or interpretation of their manuscript. All sources of financial support for the project should be disclosed.

Fundamental errors in published works
When an author discovers a significant error or inaccuracy in his/her own published work, it is the author’s obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper.
