## Preface

Assalamu 'alaikum wr.wb.

Dear readers of the Jurnal Kreano,

**Kreano, Jurnal Matematika Kreatif-Inovatif**, Vol. 13 (1), June 2022 is here to greet loyal readers, academics who have a young spirit in serving, storing, criticizing, and providing solutions to every phenomenon that occurs in learning mathematics through steps the scientific.

The transition from a pandemic to an endemic change the way of learning in schools. During the pandemic, teachers and lecturers tend to learn through online modes, while at this time, teachers are starting to get used to hybrid and even face-to-face modes. There is one thing that has not changed, namely culture. In various ways of teaching, culture will always be one approach that helps students understand mathematics.

This change is certainly not an obstacle. This is a challenge from all elements of learners so that the quality of education will increase. Journal Kreano will always be a part of that change. Hopefully the Journal together with authors, researchers, and readers can be part of the process of improving the quality of education.

Happy reading!

Wassalamu 'alaikum wr.wb.
