

Unnes Journal of Mathematics Education

Volume 7 Number 1 March 2018

Contents

DESCRIPTION

Unnes Journal of Mathematics Education published by Department of Mathematics, Faculty of Mathematics and Natural Sciences, Universitas Negeri Semarang issued three (3) times a year ie March, August, and November, contains scientific research and conceptual articles of mathematics education. This journal contains innovative learning topics, development of learning tools, curriculum design, assessment, and the up to date mathematics education research.

ISSN

2252-6927 (p-ISSN)

2460-5840 (e-ISSN)

E-JOURNAL

<http://journal.unnes.ac.id/sju/index.php/ujme>

- 1 - 7 **The mathematical problem solving ability of student on learning with Thinking Aloud Pair Problem Solving (TAPPS) model in term of student learning style**
Mashuri Mashuri, Nindy Dwi Nitoviani, Putriaji Hendikawati
- 8-16 **Problem solving ability of seventh grade students viewed from geometric thinking levels in search solve create share learning model**
Kristina Wijayanti, Aizzatun Nikmah, Emi Pujiastuti
- 17-23 **The effectiveness of auditory intellectually repetition learning aided by questions box towards students' mathematical reasoning ability grade XI SMA 2 Pati**
Arief Agoestanto, Oei Yuda Setiyo Priyanto, Bambang Eko Susilo
- 24-30 **Mobile technology in a mathematics trail program: how does it works?**
Adi Nur Cahyono, Miftahudin Miftahudin
- 31-38 **The enhancement of students' ability in problem solving and mathematical disposition aspect through brain-based learning model**
Ika Deavy Martyaningrum, Nuriana Rachmani Dewi, Wuryanto Wuryanto
- 39-47 **Self-assessment on the achievement of the ability of mathematical proportional application in Meaningful Instructional Design (MID) learning viewed from student's learning style**
Mulyono Mulyono, Kartono Kartono, Meis Dania Nila Rosyida
- 48-56 **Mathematical literacy ability of 9th grade students according to learning styles in Problem Based Learning-Realistic approach with Edmodo**
Wardono Wardono, Scolastika Mariani, Rista Tri Rahayuningsih, Endang Retno Winarti
- 57-62 **Misconception as a critical and creative thinking inhibitor for mathematics education students**
Rochmad Rochmad, Muhammad Kharis, Arief Agoestanto, Muhammad Zuhair Zahid, Mashuri Mashuri
- 63-71 **The effect of scaffolding techniques on the ability of student's reasoning ability and mathematics anxiety reviewed from gender**
Siti Sofiatun, Pinta Deniyanti Sampoerna, Lukman El Hakim
- 72-77 **The students' activity profiles and mathematic problem solving ability on the LAPS-Heuristic model learning**
Amidi Amidi, Farah Anisah Zahra
